1911 — Home of Dependable Seeds — 1933

February, 1933

Dear Sir:

This 8-page folder is sent to you in place of the catalogue which we have published for the past 10 or 12 years. So many of our customers take advantage of the good roads to drive to Harrisonburg and buy seeds and other supplies direct from us, that we decided to eliminate the expense of the elaborate catalogue and pass along our savings to you in the form of LOWER PRICES for the same HIGH QUALITY MERCHANDISE

As evidence of the saving this folder means to you, our seed packages which formerly sold for 10c are now priced at 5c. Prices are likewise drastically reduced on bulk, Field and Garden seeds.

DEPENDABLE SEEDS - in going over this price list you'll note that we have referred to our seeds as DEPENDABLE SEEDS. They have won this reputation for themselves by being TRUE TO NAME...high in GERMINATION and VITALITY.

The HIGH GERMINATION of our seeds can be verified by referring to the State Department of Agriculture, Bulletin No. 299 issued in November 1932 which report shows the standing of the Garden Seed Merchants in the State of Virginia in 1932. We are very proud to say that out of 46 samples officially drawn by the State Commissioner, only one fell below the Virginia Standard which places us well up among the 3 leading Seed Houses in the State of Virginia.

We still solicit mail orders. There's an order blank enclosed for your convenience if you prefer to buy that way. You can rest assured that your order will be filled accurately and delivered promptly.

We trust this price list may be found as convenient and helpful as the catalogue, and should you desire any other information, do not hesitate to call upon us.

Cordially yours,

THE WETSEL SEED COMPANY, Inc.

Please Note: You will also find Wetzel's Dependable Garden and Field Seeds for sale in most every town in the Valley. Ask for WETSEL'S SEEDS at your local Merchant.

THE WETSEL SEED CO., Inc., give no warranty, express or implied, as to the description, quality, productiveness or any other matter of any seeds, bulbs, or plants they send out, and will not be responsible for the crop.

Giant Pascal	.5	.20	.75	2.50
Fordhook	.5	.30	1.00	3.50

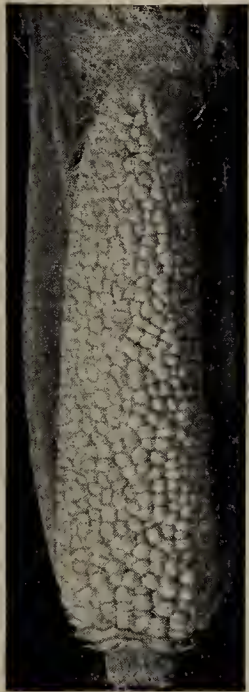

(Prices Postpaid)

Sweet or Sugar Corn

CULTURE—Plant from April to July, one inch deep in rows three feet apart, leaving eighteen inches between the plants. The small extra early varieties such as Early Adams may be planted earlier and as close as two feet, providing the soil is very rich or the ground heavily fertilized. As sugar corn is very sensitive to cold and damp weather, and should not be planted until the ground has become thoroughly warm.

	1 lb	2 lbs	5 lbs	10 lbs
Extra Early Adams	.15	.25	.60	\$1.00

(Postage Prepaid on Endive)

Kale

CULTURE—Spring or Smooth Kale can be sown either in the Spring or Fall. Siberian Kale can also be sown in the Spring and Fall. Dwarf Blue Curled Scotch should be planted only in the Fall, as it is not edible until after frost. Sow seven pounds broadcast, three to four pounds in drills per acre.

	Pkt.	oz.	2 oz.	¼ lb.	1 lb.
Spring Kale	.5	.10	.15	.25	.70
Early Curled Siberian	.5	.10	.15	.25	.80
Blue Curled Scotch	.5	.10	.15	.30	.90

(Prices Postpaid on Kale)

The best way to save money on buying seeds is to buy quality seeds. Cheap seeds may save a few cents at the start, but by buying the best you save \$\$\$\$ in the end.

Big Boston Lettuce

Lettuce

CULTURE—As lettuce will stand considerable freezing, it may be seeded and transplanted out of doors as soon as the soil can be worked in the Spring. For succession, sow every three weeks. One ounce will produce about 1000 plants.

	Pkt.	oz.	2 oz.	¼ lb.	1 lb.

(Lettuce Prices Postpaid)

Muskmelons or Cantelopes

CULTURE—Prepare hill four to six feet apart, in a rich, moderately dry sandy soil, using well-rotted manure. When frost is over, plant ten to twelve seeds in each hill, about one inch deep, and when well up, thin out, leaving four strong plants to the hill. Do not grow near cucumbers, squash, etc. One ounce plants fifty hills; two lbs. to the acre.

	Pkt.	oz.	2 oz.	¼ lb.	1 lb.

Muscatine Wilt-Resistant Watermelons

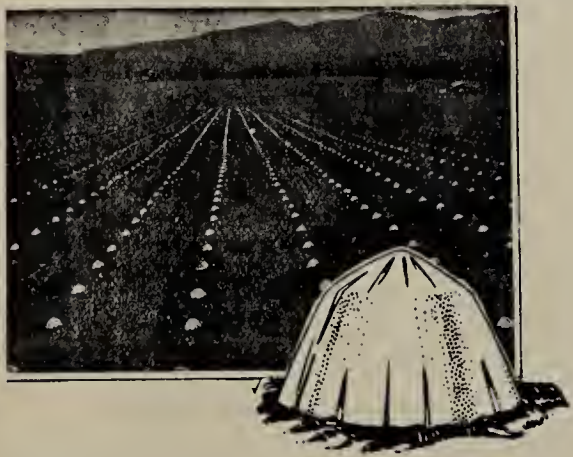

Watermelons

CULTURE—Prepare hill eight to ten feet apart each way by working in thoroughly well-rotten manure or poultry droppings—rich ground gives the plants a good start before insects attack them. When the ground is warm, plant six or eight seeds to the hill, covering an inch deep and when well up, thin out, leaving three strong plants to each hill. Do not grow near pumpkins. One ounce will plant thirty hills; three pounds one acre.

Germaco Hotcaps

A money-maker—matures crops earlier; shields plants from frost, wind and rain; protects them from insects; miniature "hot-houses." An amazing invention—crop INSURANCE. A revolutionary device that saves farmers much time, labor and money. One roll of a thousand, \$9.75. Steel Setter, \$2.25; 250 Hotcaps with Papier Mache Setter, \$3.00. Postage or express extra. Write for quantity prices and pamphlet.

NOTICE—Prices on Potatoes, as most of our customers know, are constantly changing.

5-8-5 FERTILIZER FOR POTATOES
and other truck
100-lb. bag \$1.60; 500-lb. bag \$1.50; Ton \$26.

Seed Potatoes

CERTIFIED and SELECTED

Prices F. O. B. Harrisonburg and Subject to Change. Maine Grown.

EARLY ROSE

This is an early variety, used very extensively everywhere. Not as early as Red Bliss, but larger. Skin a pale pink, but when cooked is pure white. Considered a good yielder. Price: Pk. 35c; bu. \$1.10; 10 pk. bag, \$2.50.

IRISH COBBLER

For the general market the Cobbler is undoubtedly the variety to grow. As a rule you will find this brings top prices. It might be said that the Cobbler is the standard, all other prices being more or less set by what Cobblers are bringing. Our Cobbler stock is strictly Maine Grown of the very highest quality.

Prices at time of going to press: Pk. 35c; bu. \$1.10; 10 pk. bag, \$2.50. Five bags \$2.40 bag.

RED BLISS or BLISS TRIUMPH

This well-known variety is used chiefly for first planting with the idea of producing matured potatoes for the table at the earliest possible date. Are sometimes called "six week."

Price: Pk. 35c; bu. \$1.35; 10 pk. bag, \$3.30.

GREEN MOUNTAIN

Has the reputation of making big crops everywhere and on practically any kind of soil, producing large, handsome, smooth, oval-shaped potatoes with white skin.

Pk. 35c; bu. \$1.10; 10 pk. bag, \$2.50; Five bags, \$2.40 per bag.

NOTE—Can Supply CERTIFIED SEED POTATOES at 25c per bushel, or 60c per bag more.

Bermuda Onion Plants

Pride-Pack—We can supply Crystal Wax White or Yellow Bermuda Onion Plants. Nothing less than 100 plants mailed. State if satisfactory to substitute Yellow for White or White for Yellow in case we are out of the variety ordered when order is received.

Postpaid Prices:

100 Plants	\$.35
200 Plants	.50
500 Plants	.95
1,000 Plants	1.70
Not Postpaid—Crate of 6,000 Plants	\$7.50

Special Prices on Onion Plants at Store

We can supply Home Grown Cabbage and Tomato Plants at Reasonable Prices.

Frost Proof Cabbage Plants

For shipment in Bunches of 50 Plants February 15 to April 15.

No order for less than one bunch accepted for mailing.

Southern Grown, Frost-Proof Cabbage Plants are far superior to Hotbed or Cold Frame plants for early planting, and cost less than one-half as much. Lower prices at the Store.

Wetsel's Dependable Flower Seeds

Rock Garden

Sweet Peas

CULTURE—Ounce plants 25 feet. Early planting is advised so that they may bloom before very hot weather. Dig the soil deeply to allow deep rooting. Open a trench four to six inches deep, in which plant the seeds early in February and cover with an inch of soil, and press it firmly. When about two inches high, begin cultivating and gradually fill the trench until it is level. Do not allow the roots to become too dry; water at least twice a week. Sweet Peas bloom better and longer if kept cut closely.

Supurb Spencer Mixture—Pkt. 10c; Oz. 15c; ¼ lb. 50c; 1 lb. \$1.70.

Special Grandiflora Mixture—Pkt. 10c; Oz. 15c; ¼ lb. 45c; 1 lb. \$1.50.

Second size bulbs nine to eleven inches in circumference. Postpaid, 25c each. Not postpaid 20c.

CHOICE DAHLIAS

We can supply some of the latest and choicest varieties of Dahlia Bulbs at very reasonable prices.

WIZARD
 TRADE BRAND MARK
 PULVERIZED

Sheep Manure

FOR LAWNS—It promotes strong, healthy growth and a bright green velvety turf. Ten pounds for each 100 sq. feet should be worked into the soil before seeding, or scatter broadcast over old lawn and wet down. No weeds—no litter—quick and pleasing results are certain.

For Flowers, Shrubs, Vines, Trees, Etc.—Nothing else will produce foliage and force blooming like Wizard Sheep Manure. It's just what nature needs to make things grow. One pound for each 10 square feet of surface well mixed into the soil before planting, and one to ten pounds dug in around vines, shrubs, trees etc., is sufficient.

Prices—Not Postpaid

2 lbs. 15c; 5 lbs. 30c; 10 lbs. 50c; 25 lbs. 80c; 100 lbs. \$2.40; 500 lbs. at \$2.25; Ton \$42.00.

National
Eazy Wear
 Garden Glove

A NEW and BETTER GARDEN GLOVE

Made from special imported hides processed to render them amazingly soft and pliable. Permit almost barehand freedom yet provide complete all-leather protection. Ideal for garden and similar uses. **Dirt-proof—Durable—Washable**—Four sizes: "Medium" and "Large" for women, "Medium" and "Large" size for men. Price, 75c a pair—2 pairs for \$1.40. 80c postpaid.

Wetsel's Dependable Field Seeds

Korean Lespedeza

A legume that will grow in acid soil and on thin worn-out lands. Very drouth resistant. Can be sown without soil preparation. Will reseed and come from year to year. Should be in every pasture. Inoculate, using the regular cow pea inoculation.

Certified—12c. lb. 1c less in 25 lbs. or more. Dodder free Seed—10c lb.; 1c less in 25 lbs. or more.

Sericea Lespedeza

A perennial, once started will stand indefinitely—very hardy and drought resistant. Thrives on thin acid soil. Very leafy and a heavy seeder. Will make two cuttings the first year. A heavy and deep root system. Plant in spring after danger of killing frost. Sow about 2 lbs. seed per acre, in three foot rows, and cultivate first year. Cover about eighth inch. Inoculate using the cow pea inoculation.

Certified and Scarified Seed
Ounce 40c; half pound \$2.50; pound \$4.50.

The four ears of corn represent the small cost of dis-in-tant for producing the average added profit of 3 bushels per acre.

Selected Field and Ensilage Corn

Field Corn

Selected and Tested. Price subject to change.

LANCASTER COUNTY SURE CROP

This new variety has been giving excellent satisfaction for the past few years. The ear is 10 to 14 inches long with 14 to 16 rows of deep yellow broad grains. Height 8 to 10 feet. Season 90 to 110 days. Especially adapted for thin soil. 1 pk. (14 lbs.) 50c; 1 bu. (56 lbs.) \$1.25; 5 bus. \$1.20 per bu.

BLOODY BUTCHER

Speckled Red and Yellow

A few years ago this Corn was used very little. In recent years Bloody Butcher has become very popular because of its yielding qualities and its ability to produce a crop under adverse conditions. 1pk. (14 lbs.) 40c; 1 bu. (56 lbs.) \$1.25; 5 bu. lots \$1.20 per bu.

Yellow Corns

REID'S YELLOW DENT

One of the most popular yellow dent varieties. Ears average 9 to 11 inches in length, filled with deep kernels of a rich golden yellow which almost entirely cover both butt and tip ends. Matures in 115 days. 1 pk. (14 lbs.) 40c; 1 bu. (56 lbs.) \$1.25; 5 bus. at \$1.20 per bu.

EARLY MASSODENT

This is one of the old reliable favorably known varieties in this part of the state. Sometimes called White-Cap. Ears large, grains rather deep, pale yellow on cob, but shows up as a rich yellow when shelled. Fodder medium to small, depending on soil. Also sometimes known as "poor land" corn, or "up land." 1 pk. (14 lbs.) 40c; 1 bu. (56 lbs.) \$1.25; 5 bus. \$1.20 per bu.

GOLDEN GOARD SEED DENT

This is probably one of the most used and admired corns in this part of the state. As a yellow corn, it will roll up more barrels than any variety. Stalks very large with good foliage. Ears large running 18 to 24 rows, deep grain and deep yellow. Cannot be beaten for number of bushels. Probably not as good all around corn as Reid's Yellow Dent. Makes a good ensilage corn where you want to fill silo from regular crop. 1 pk. (14 lbs.) 40c; 1 bu. (56 lbs.) \$1.25; 5 bus. \$1.20 per bu.

White Corns

IMPROVED BOONE COUNTY

or JOHNSON COUNTY WHITE

Originated in Boone County, Indiana, from which it takes its name. It is probably the best known White Dent variety in the central corn belt; does equally well in Pennsylvania. Ears average 10 inches in length and from 7½ to 8 inches in circumference, with 18 to 24 rows; both cob and kernel are white. Matures in 110 to 120 days. 1 pk. (14 lbs.) 40c; 1 bu. (56 lbs.) \$1.25; 5 bus. \$1.20 per bu.

IOWA SILVER MINE WHITE

Here is a white corn that is quite in demand, because of being early. If planted at same time you plant your yellow varieties, it will mature about 15 days earlier. Is especially recommended for grinding into meal. 1 pk. (14 lbs.) 40c; 1 bu. (56 lbs.) \$1.25; 5 bus. \$1.20 per bu.

Selected Ensilage Corn

EUREKA ENSILAGE

Eureka is a double purpose corn, for aside from being a first-class ensilage corn, as a field variety it ranks high in yield. It is tall and leafy, 12 to 15 feet high, with an enormous growth of fodder. It bears one to two ears to the stalk, the ears frequently over 12 inches, and like all corns that bear more than one ear to the stalk, should be grown on good lands. We recommend it for bottom lands and low grounds. Not prepaid, gal. 25c; pk. 40c; bu. \$1.50; 5 bus. \$1.40 per bu.

VIRGINIA ENSILAGE

This continues to be one of the most satisfactory ensilage corns, making a large growth of broad, thick, succulent fodder. The discriminating dairymen of the North and Middle West recognize its merit as a silo filler and plant it in increasing quantities each season. Not prepaid, gal. 25c; pk. 40c; bu. \$1.50; 5 bus. \$1.40 per bu.

PAMUNKEY ENSILAGE

It is of strong and vigorous growth, attaining a height of 13 to 15 feet, yields an unusually heavy growth of fodder and usually bears two ears to the stalk. The ears are 10 to 12 inches long, 2¼ to 2½ inches in diameter, with a good depth of grain. In tonnage of ensilage we do not believe it can be surpassed. We have seen stalks that attained 18 feet in height. It is a real silo filler, as proved by reports from dairymen and stockmen in every section of the country. Not prepaid, gal. 25c; pk. 40c; bu. \$1.60. Wt. ¼ bu. 14 lbs.; ½ bu. 28 lbs.; bu. 56 lbs.

STOP BIRDS FORM PULLING PLANTED SEED

USE BONIDE

CRO-TOX

The Sure-Fire Repellent

It keeps crows, larks, starlings, doves, blackbirds pheasants and other corn pulling birds from molesting corn while it is germinating, sprouting and rooting. Saves seed loss and labor of replanting. Will not clog any planter.

It is non-poisonous—will not kill birds—it repels them. Sure, safe and economical—costs but a few cents per acre to use and saves you dollars and days of cure.

Half pint, one bushel size, 60c; Pint, two bushel size, \$1.00; quart, four bushel size, \$1.50. Postpaid.

Increase Farm Profits

By Lowering Product Cost.

SEMESAN JR.—For seed, field and sweet corn. Simple, quick, effective. Costs only 2½c an acre. Protects seed from rotting in cold wet soil, makes earlier planting possible. 4 oz. 50c; 1 lb. \$1.75. Cannot be mailed.

IMPROVED SEMESAN BEL—For seed potatoes. This quick dip treatment has cut treating costs to 1½c to 3c per bushel of seed. 1 lb. Improved Semesan Bel will treat 60 to 80 bushels of seed potatoes. 4-oz pkg. 50c; 1 lb. \$1.75. Cannot be mailed.

SEMESAN—Makes seeds healthy. Semesan is the answer to the disease problems for the flower and vegetable grower. 2 oz. can 50c.

SEMESAN (Improved) For Oats, Wheat and Barley. Ask for prices.

Rape Seed

DWARF ESSEX

This crop is very highly recommended for cattle, sheep, hogs and poultry. Sow in early spring 3 to 5 pounds per acre in drills, or 8 to 10 pounds per acre broadcast. Also an excellent green to use on the table.

Lb. 8c; 10-lbs. 7c per lb.; 25-lbs. 6c per pound; 100-lbs. 5½c per lb., not postpaid.

NEWTOWN DRUM OIL BROODER

This Newtown Brooder has a stove shaped like a drum. It does everything a coal-burning brooder will do, with the greater convenience of oil for fuel. It has the capacity to provide more heat than will ordinarily be needed. The rate of burning is automatically controlled by the accurate thermostat. Whether the stove burns high or low, it is safe and dependable.

The stove is built to develop maximum heat from the fuel. Distillate of 36 degrees gravity or better can be used. This makes the brooder very economical to operate. The front half of the canopy can be raised. This gives easy access to the floor. And the canopy is shaped to radiate warmth over a big area. Furthermore, it draws away foul air and odors. Your chicks are always comfortable under and around this brooder. All conditions are favorable to their health and growth.

See the Newtown "Drum Type" Oil Brooder before you decide on what you're going to buy. Examine it at the first opportunity.

There Are Two Models

CLOVER and GRASSES

NOTE—Fourth bushel at bushel rates. Less than fourth bushel lots at pound prices. Bags 20c. These offers are made for your convenience. Don't overlook them.

Clovers

(Our Red and Sapling Clover is Valley grown—re-cleaned by us—Tested.)

MAMMOTH OR SAPLING

Purity 98.50 to 99.00

Mammoth or Sapling Clover is widely known and used very extensively, especially when clover is seeded with Timothy, and is desired to cut for hay. Mammoth Clover being later than old time Red, matures much more evenly with Timothy. It makes a much more vigorous growth resulting in greater tonnage per acre. Has the disadvantage of not producing a large growth after first cutting, and for this reason is not as good a soil improver as Red Clover.

Price subject to change, sacks 20c extra, per lb., 13c; bushel, \$6.75; 5 bus. \$6.50 per bushel.

MEDIUM OR RED CLOVER

Purity 98.50 to 99.00

Red Clover, sometimes referred to as Old Time Red or Little Red Clover, need no description with the average farmer. It has for many years been the leading clover in farm rotation. Matures early and produces a second crop, affording late pasture, a crop of seed, or if left on the ground is fine for improving soil. It produces a nitrogen needed in most soils, that is hard to obtain in any other way.

You can depend on us shipping you nothing but the very best quality of seeds, free of all noxious weeds and of the highest possible vitality. In recent years farmers have complained of not being able to hold clover after it came through the ground. We believe this is due to lack of bacteria, and if you will inoculate your seed at a cost of \$1.00 per bushel, you can overcome this trouble.

Price, subject to change: 13c per lb.; bu. \$6.75; 5 bus. \$6.50 per bu. Sack 20c extra. Lb. 16c; Bu. \$8.75; 5-bu. \$8.50 per bu.

Wesco 99.50.....Lb. 5c; Bu. \$1.80; 5-bu. \$1.75

ORCHARD GRASS

Wesco, Purity 85.00—Lb. 12c; Bu. \$1.50;

8-bu. lots, \$1.40 per bu.

Va. Grown, Purity 75.00—Lb. 11c; Bu. \$1.35;

8-bu. lots, \$1.25 per bu.

Hairy Vetch

CULTURE—Vetch may be sown as early as the ground will permit in the spring, at the rate of 15 pounds to the acre, with one bushel of oats to hold it up. May be sown same way in Fall, only using Winter rye in place of oats.

Vetch is a wonderful land improver. The oats and rye hold the vetch up, and improves the quality of hay.

Not Postpaid

Lb. 11c. 50 lbs and up 10c per lb.

Prices on all Field Seeds are subject to change without notice.

Cow Peas and Soy Beans

Cow Peas

RECLEANED

There will be an unusual demand for Cow Peas this summer, as well as most forage crops. There is three reasons for this demand. First, the Valley farmers need some quick crop to supply hay for next winter. Second, Cow Peas are cheaper, or as cheap as Soy Beans. Third, farmers are realizing that Cow Peas will improve the land a little more than Soys.

	Bu	5-Bu.	10-Bu.
Mixed (Clay)	\$1.25	\$1.20	\$1.10

Early Small Black-Eye	Lb. 10c; 10-lbs. 8c per lb.
Gray Crowder (Large)	Lb. 8c; 10-lbs. 6c per lb.
Cream Crowder (Brown)	Lb. 10c; 10-lbs. 8c lb.

Swedish Select Oats

Those who prefer a white oat will make no mistake in sowing Swedish Select. One of the State Experiment Stations reports in a test covering several years an average yield of slightly more than 10 bushels to the acre more than varieties tested, and that the proportion of kernel to the whole grain averaged about 75 per cent. It has given especially good crops on light soils without any tendency to lodge, yet the straw is not large in proportion to the grain, which is large, thick and plump. Not recommended for the coast section.

Bushel 45c; 10-bushel lots at 43c per bu. (Bag ncluded)

BLUE GRASS (Kentucky)

Wesco, Purity 81.00—Lb. 15c; Bu. \$1.50; 8-bu. lots, \$1.45 per bu.
